

# 3.2A Properties of a Function's Graph (Graphically)

## ▼ Intercepts

### ▼ Definition of an **x-intercept**

An **x-intercept** is the ordered pair where the graph crosses or touches the x-axis.

### ▼ Definition of a **y-intercept**

A **y-intercept** is the ordered pair where the graph crosses or touches the y-axis.

## ▼ Domain and Range

### ▼ Definition of Domain

The **domain** is the set of all first coordinates. (x's)

### ▼ Definition of Range

The **range** is the set of all second coordinates. (y's)

## ▼ Increasing, Decreasing, Constant

### ▼ Definition of Increasing

A function  $f$  is increasing on an interval  $(a, b)$  if, for any  $x_1$  and  $x_2$  chosen from the interval with  $x_1 < x_2$ , the  $f(x_1) < f(x_2)$ . (The graph of an increasing function always goes "up" from left to right.)

### ▼ Definition of Decreasing

A function  $f$  is decreasing on an interval  $(a, b)$  if, for any  $x_1$  and  $x_2$  chosen from the interval with  $x_1 < x_2$ , the  $f(x_1) < f(x_2)$ . (The graph of an decreasing function always goes "down" from left to right.)

▼ Definition of Constant

A function  $f$  is constant on an interval  $(a, b)$  if, for any  $x_1$  and  $x_2$  chosen from the interval with  $x_1 < x_2$ , the  $f(x_1) = f(x_2)$ . (The graph of an constant function always goes "flat" from left to right.)

▼ Relative Minimum or Relative Maximum

▼ Definition of Relative Maximum

When a function changes from increasing to decreasing at a point  $(c, f(c))$ , then  $f$  is said to have a relative maximum at  $x = c$ . the relative maximum is  $f(c)$ .

▼ Definition of Relative Minimum

When a function changes from decreasing to increasing at a point  $(c, f(c))$ , then  $f$  is said to have a relative minimum at  $x = c$ . The relative minimum is  $f(c)$ .

▼ Symmetry

▼ Examples of x-axis symmetry

▼ Examples of y-axis symmetry

▼ Examples of origin symmetry

▼ Even, Odd or Neither

▼ Definition of an Even Function

A function  $f$  is **even** if for every  $x$  in the domain,  $f(x) = f(-x)$ . The graph of an even function is symmetric about the y-axis. For each point  $(x, y)$  on the graph, the point  $(-x, y)$  is also on the graph.

▼ Definition of an Odd Function

A function  $f$  is **odd** if for every  $x$  in the domain,  $-f(x) = f(-x)$  or  $f(x) = -f(-x)$ . The graph of an odd function is symmetric about the origin. For each point  $(x, y)$  on the graph, the point  $(-x, -y)$  is also on the graph.

▼ Examples

- Does the graph on the right represent a function? \_\_\_\_\_
- Does the graph on the right represent a one-to-one function? \_\_\_\_\_
- Which type of symmetry does the graph have? (circle one) x-axis, y-axis, or origin or no symmetry
- Identify the intercepts of the graph above. Write the intercepts as ordered pairs.  
 x-intercept(s): \_\_\_\_\_  
 y-intercept(s): \_\_\_\_\_
- Use the graph above to determine the domain and range. Use interval notation.  
 Domain: \_\_\_\_\_  
 Range: \_\_\_\_\_
- Use the graph above to determine the intervals of increasing and decreasing. Use interval notation.  
 Increasing: \_\_\_\_\_  
 Decreasing: \_\_\_\_\_  
 Constant: \_\_\_\_\_
- Use the graph above
  - to find the numbers if any at which  $f$  has a relative minimum and what are these relative minima? (relative minimum of \_\_\_\_\_ at  $x=$ \_\_\_\_\_)
  - to find the numbers if any at which  $f$  has a relative maximum and what are these relative maxima? (relative maximum of \_\_\_\_\_ at  $x=$ \_\_\_\_\_)
- Use the graph above to find the following.
  - Find  $f(x)$  for  $x=$ \_\_\_\_\_?
  - Find  $f(x)$  for  $x=$ \_\_\_\_\_?
  - For what value of  $x$  is  $f(x)=$ \_\_\_\_\_ ?
  - For what values of  $x$  is  $f(x)\leq 0$ ?

1. Does the graph on the right represent a function? \_\_\_\_\_
2. Does the graph on the right represent a one-to-one function? \_\_\_\_\_
3. Which type of symmetry does the graph have? (circle one) x-axis, y-axis, or origin or no symmetry
4. Identify the intercepts of the graph above. Write the intercepts as ordered pairs.  
 x-intercept(s): \_\_\_\_\_  
 y-intercept(s): \_\_\_\_\_
5. Use the graph above to determine the domain and range. Use interval notation.  
 Domain: \_\_\_\_\_  
 Range: \_\_\_\_\_
6. Use the graph above to determine the intervals of increasing and decreasing. Use interval notation.  
 Increasing: \_\_\_\_\_  
 Decreasing: \_\_\_\_\_  
 Constant: \_\_\_\_\_
7. Use the graph above
  - a. to find the numbers if any at which  $f$  has a relative minimum and what are these relative minima? (relative minimum of \_\_\_\_\_ at  $x=$ \_\_\_\_\_)
  - b. to find the numbers if any at which  $f$  has a relative maximum and what are these relative maxima? (relative maximum of \_\_\_\_\_ at  $x=$ \_\_\_\_\_)
8. Use the graph above to find the following.
  - a. Find  $f(x)$  for  $x=$ \_\_\_\_\_?
  - b. Find  $f(x)$  for  $x=$ \_\_\_\_\_?
  - c. For what value of  $x$  is  $f(x)=$ \_\_\_\_\_ ?
  - d. For what values of  $x$  is  $f(x)\leq 0$ ?

1. Does the graph on the right represent a function? \_\_\_\_\_
2. Does the graph on the right represent a one-to-one function? \_\_\_\_\_
3. Which type of symmetry does the graph have? (circle one) x-axis, y-axis, or origin or no symmetry
4. Identify the intercepts of the graph above. Write the intercepts as ordered pairs.  
 x-intercept(s): \_\_\_\_\_  
 y-intercept(s): \_\_\_\_\_
5. Use the graph above to determine the domain and range. Use interval notation.  
 Domain: \_\_\_\_\_  
 Range: \_\_\_\_\_
6. Use the graph above to determine the intervals of increasing and decreasing. Use interval notation.  
 Increasing: \_\_\_\_\_  
 Decreasing: \_\_\_\_\_  
 Constant: \_\_\_\_\_
7. Use the graph above
  - a. to find the numbers if any at which  $f$  has a relative minimum and what are these relative minima? (relative minimum of \_\_\_\_\_ at  $x=$ \_\_\_\_\_)
  - b. to find the numbers if any at which  $f$  has a relative maximum and what are these relative maxima? (relative maximum of \_\_\_\_\_ at  $x=$ \_\_\_\_\_)
8. Use the graph above to find the following.
  - a. Find  $f(x)$  for  $x=$ \_\_\_\_\_?
  - b. Find  $f(x)$  for  $x=$ \_\_\_\_\_?
  - c. For what value of  $x$  is  $f(x)=$ \_\_\_\_\_ ?
  - d. For what values of  $x$  is  $f(x)\leq 0$ ?
